

COMSATS ISLAMABAD UNIVERSITY

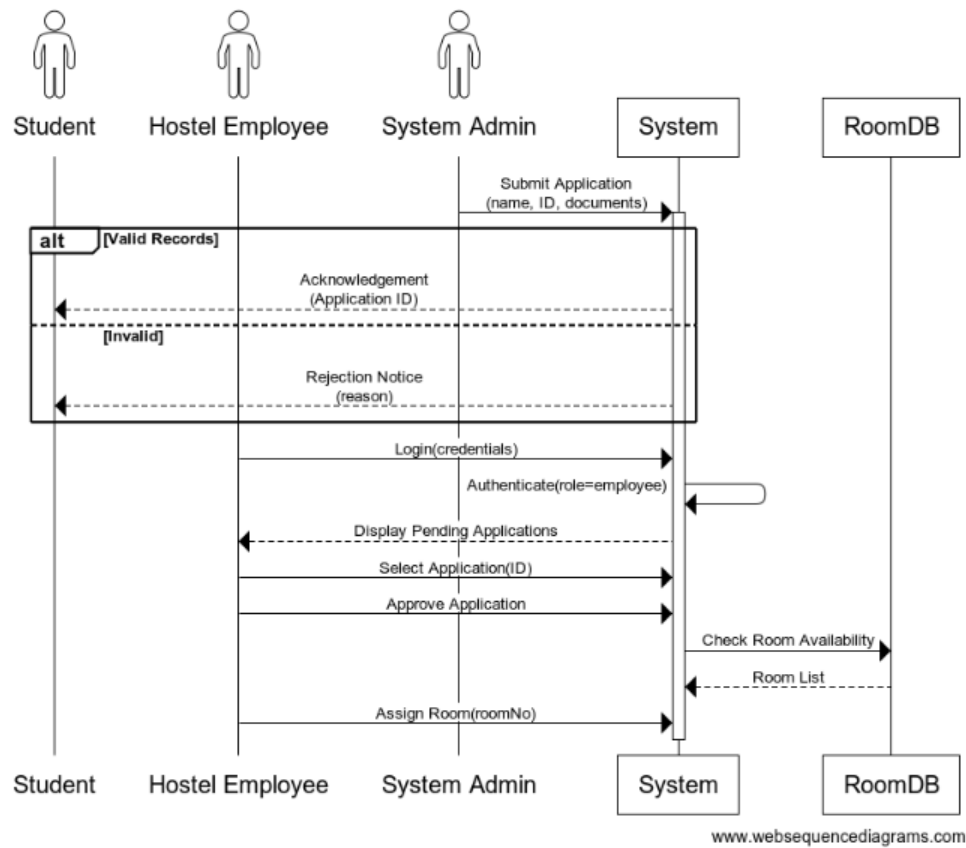

Assignment No : 01

Name : *Uzair Arif*

Registration No : *Sp23-BSE-168*

Use Case Element	Details
Use Case Name	New Student Admission
Primary Actor	Hostel Warden
Secondary Actors	Admin
Stakeholders	<ul style="list-style-type: none"> • Student: Wants smooth room allocation • Warden: Needs accurate record-keeping • Admin: Ensures policy compliance
Preconditions	<ol style="list-style-type: none"> 1. Student is institutionally admitted 2. Required documents submitted 3. System operational with valid warden access 4. Rooms available (or waiting list active)
Postconditions	<ol style="list-style-type: none"> 1. Student registered in hostel system 2. Room assigned and marked occupied 3. Attendance record initialized 4. Welcome notification sent
Main Success Scenario	<ol style="list-style-type: none"> 1. Warden logs in → Student Management 2. Selects "New Admission" 3. Enters student details + documents 4. System verifies institutional admission 5. Auto-assigns room (or manual selection) 6. Generates hostel ID card 7. Sys sends confirmation to all parties
Alternative Flows	<p>A1. No rooms available → Waitlist</p> <p>A2. Document missing → System flags for completion</p> <p>A3. Duplicate entry → System alerts warden</p>
Exception Flows	<p>E1. System crash during entry → Data recovery protocol</p> <p>E2. Unauthorized access attempt → Logs incident + alerts admin</p>
Special Requirements	<ul style="list-style-type: none"> • Biometric integration for check-in • Automated bed/room inventory updates • GDPR-compliant data storage
